

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Rathbone Global Alpha Fund

A sub-fund of Rathbone Alpha Funds (OEIC)

Authorised Corporate Director: Rathbone Unit Trust Management Limited

Accumulation shares ISIN: GB00B8W5FR09

## Objectives and investment policy

We aim to deliver a total return 2% above our benchmark (made up of 50% FTSE All-Share Index and 50% FTSE World ex-UK Index), after fees, over any rolling three-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use our benchmark as a target for our fund's return because it represents global stock market returns.

We invest in collective funds and structured products. These funds are either actively managed to meet an objective or passively managed to track a price or index.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmark over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within three years.

Our fund is designed for investors with a basic knowledge of equity fund investments who seek growth. You should intend to invest for longer than three years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell shares on each business day of the fund between 9am and 5pm.

The fund offers accumulation shares (shares in which any dividends received are added to the share price).

## Risk and reward profile

The risk indicator for this fund reflects the following:  
– As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

**Counterparty risk:** A company that we deal with may renege on its obligations, costing you money.

**Currency risk:** We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

**Liquidity risk:** Some assets become hard to sell at their expected price. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

**Management risk:** People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

**Operational risk:** We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

## Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 31 October 2019.

### One-off charges taken before or after you invest:

Entry charge none
