

# RATHBONE MULTI-ASSET STRATEGIC INCOME PORTFOLIO

S Accumulation GBP

31 October 2025

## RISK TARGET

66.67% of the FTSE Developed stock market index volatility.

## INVESTMENT OBJECTIVE

The objective of the fund is to deliver an income of 3% or more each year. We also aim to deliver a greater total return than the CPI measure of inflation + 3%, after fees, over any rolling five-year period by investing with our Liquidity Equity-type risk and Diversifiers (LED) framework. The fund seeks a level of volatility that is two-thirds of the volatility of the FTSE Developed stock market index (or up to 15% above or below this level). There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI + 3% as a target for our fund's return because we aim to grow your investment above inflation. We refer to the amount of volatility risk our fund seeks to take because we want our investors to understand the risk they are taking in terms of the global stock market.

## FUND PERFORMANCE SINCE INCEPTION

01.10.2015 to 31.10.2025, mid-mid, percentage change. Past performance should not be seen as an indication of future performance. The value of investments and the income from them may go down as well as up and you may not get back your original investment.

## FUND RATINGS

## SUSTAINABLE RATINGS

## IMPORTANT INFORMATION

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbones Asset Management Limited.

Investors should carefully read the Key Investor Information Document (KIID), Supplementary Information Document (SID) and Prospectus for detailed investor risks and before making an investment decision.

The value of investments and the income from them may go down as well as up and you may not get back your original investment.

For more details on the investment policy please refer to the prospectus.

As the Manager's annual fee is taken from capital, that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying shareholders.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have any doubts about your tax position, or the suitability of this investment, you should seek professional advice.

Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Emerging markets are volatile and may suffer from liquidity problems.

The use of derivatives for investment purposes may increase the volatility of a sub-fund's net asset value and may increase its risk profile.

## IMPORTANT NOTES

If you require clarity on any of the terms used in this factsheet then please refer to our Supplementary Information Document for further explanation.

Source performance data Morningstar.

Rathbone Multi-Asset Strategic Income Portfolio Benchmark: Our benchmarks are calculated on the rate of change of the CPI index, over different time periods (e.g. if we were calculating year to date figures in January 2013, we would look at the percentage change from December 2012 to the end of January 2013). So we take CPI to the current value, and add on the 3% prorated over a year (roughly 0.25% per month). If the CPI Index benchmark were to fall, more than the amount pro-rata, the benchmark year-to-date will be negative, even though inflation as reported by the media (calculated specifically as a 12M rate of change), remains positive.

The ongoing charges figure (OCF) includes the Annual Management Charge and all appropriate costs that may be deducted from the fund's assets, in line with current regulatory and industry guidance. Where appropriate, the OCF may include a synthetic element relating to the costs incurred in underlying collective investment undertakings, where permitted by the Prospectus. The OCF is included in the Annual or Interim report and are calculated biannually.
