

# LED Managed Portfolio Service

## Proposition summary

LED Managed Portfolio Service (MPS) is an adviser-led service provided by Rathbones Investment Management (RIM). The client must have a relationship with an FCA authorised Financial Adviser, who is responsible for assessing client suitability and can assist the client with understanding the investment solution and associated risks. The service has been designed to meet the needs of clients wanting access to an actively managed portfolio within a fund structure, but not requiring a discretionary service. Each investment strategy invests in one of the funds managed by Rathbones Unit Trust Management (RUTM). All are actively managed multi-asset funds, with the exception of the Rathbone Greenbank Global Sustainability fund which is a 100% equity fund.

The funds benefit from a highly experienced fund management team, supported by Rathbones' investment process and research capability across both traditional and sustainable investment markets. Our LED (Liquidity, Equity-type risk, Diversifiers) framework provides a distinctive approach to asset allocation, focusing on the relationship between assets.

## Fair value assessment

In line with the FCA's Consumer Duty fair value outcome, an assessment of the LED MPS solution has been carried out to ensure the total cost charged to the end client is deemed reasonable when compared with the benefit received.

A number of factors were used within the value assessment, including;

- a review of service features, benefits (including past performance) and service limitations
- total costs and charges (as defined above)
- the cost to Rathbones to manufacture and distribute the service
- market rates and charges associated with other comparable competitor services

## Fair value assessment outcome

Based on a review of the factors and key metrics listed above, we deem this service to provide fair value when distributed to the intended target market.
